WAGNER PEM-X1 ORIGINAL OPERATING MANUAL Pdf Download.

Manual Application. Powder coating is a clean process that provides an attractive, durable, and high-quality finish. The coating is applied as a free-flowing dry powder and is cured by heat in order to create a hard finish. It does not require a liquid solvent to keep binder, pigments, and filler parts in suspension.

Powder Coating Manual

Powder coating is the process of coating a surface in which a powder material is applied using an electrostatic or compressed air method, or sometimes a fluidized bed. The applied powder is then heated (cured) in an oven to its melting point, after which it flows to form a smooth film which dries to a firm, durable finish very resistant to scratches, cracking, peeling, UV rays and rust.
