### Time of Death, Decomposition and Identification: An Atlas ...

Time of death is a crucial piece of information in any murder investigation, but the many factors influencing the decomposition process can make it extremely difficult to estimate.

### Time of Death, Decomposition and Identification: An Atlas ...

Decomposition is the process by which dead organic substances are broken down into simpler organic or inorganic matter such as carbon dioxide, water and mineral salt. The process is a part of the nutrient cycle and is essential for recycling the finite matter that occupies physical space in the biosphere.Bodies of living organisms begin to decompose shortly after death.

### Decomposition - Wikipedia

Human decomposition is a natural process involving the breakdown of organic tissue after death. . While the rate of human decomposition varies due to several factors, including weather, temperature, moisture, pH and oxygen levels, cause of death and body position, all human bodies follow the same four stages of human decomposition.
